

The Benefits of an ASHRAE Certification

SHINE IN A RISING FIELD

Certification validates critical job knowledge, skills and abilities in a given practice area.

GAIN A COMPETITIVE EDGE

ASHRAE certifications are recognized by over 35 national, state and municipal entities.

STAND OUT

Use the ASHRAE Certified logo and designation—e.g. Curtis Smith, BEAP, BEMP—in email signatures, professional networking and business cards to enhance your reputation.

ASHRAE WILL SING YOUR SUCCESS

Certificants and their employers are listed on the website and in ASHRAE *eSociety*.

5 Easy Steps to Earn and Maintain an ASHRAE Certification

1. Read the *Candidate Guidebook*

Visit www.ashrae.org/certification and download the guidebook for the program in which you are interested.

2. Complete the Application

Complete the online application at www.ashrae.org/certification. Membership in ASHRAE is not a requirement for certification.

3. Schedule an Examination

BCxP, BEAP, BEMP, CHD, HBDP, HFDP and OPMP examinations are offered at over 300 conveniently located computer-based testing centers worldwide. Candidates may schedule an examination appointment online or by telephone.

4. Review Available Resources

The *Candidate Guidebook* for a program identifies available resources, including practice exams, that may help candidates gain an understanding of the body of knowledge that the examination tests. Purchase of books or course registrations is not a prerequisite to taking any ASHRAE certification examination.

5. Renew the Certification

Each certification is renewable every three years. To retain certification, each certification holder must earn 45* Professional Development Hours (PDHs) during the three year period following initial certification or the last renewal.

*BCxP and BEAP require 50 PDHs.

Schedule an exam at one of over **300 testing centers** worldwide

ASHRAE Certification

Already more than 2,750 certifications earned in seven key built-environment fields.

Advance Your Career Today

Validation. Pride. Recognition.

"Because of the high level of expertise, professionalism and ethics demonstrated by ASHRAE, achieving certification under their established requirements implies one of the highest levels of competence and knowledge available in the industry."

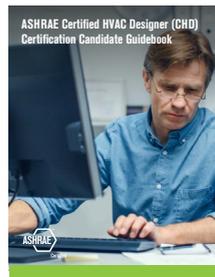

Jeffrey G Ross-Bain, BEMP, Ross-Bain Green Building, LLC

ASHRAE, the standard setter for sustainable building performance and system design and operation, validates through certification the critical knowledge, skills and abilities of professionals in seven key, built-environment fields.

Recognized by over 35 national, state and local government bodies – and with over 2,750 certifications earned – ASHRAE certifications increasingly have become the must-have credential for built-environment professionals.

NEW! Certified HVAC Designer (CHD)

Recognizing an industry need and demand for qualified HVAC designers, ASHRAE developed the Certified HVAC Designer (CHD) certification.

The CHD certification validates competency of an HVAC Designer, working under the responsible charge of an engineer, to *design HVAC systems to meet building/project requirements, including load calculations, equipment selection and sizing, mechanical equipment room design, duct and piping design and layout for the development of HVAC plans for permit and construction.*

In an “Industry Need” survey, ASHRAE Member respondents agreed:

- “The level of competence among HVAC Designers varies greatly” (95%)
- “HVAC Designer certification is a worthwhile professional development goal” (82%)
- “It is a tool to identify competent new hire prospects” (74%)

Application for the CHD launches March 1, 2019.

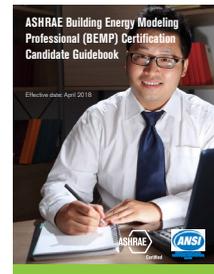

High-Performance Building Design Professional (HBDP)

The HBDP certification validates competency to *design and integrate sustainable HVAC&R systems into high performing buildings.*

Today’s building design market requires use of ground-breaking technologies in new and existing structures to meet the need of building owners.

Building Energy Modeling Professional (BEMP)

The BEMP certification validates competency to *evaluate, select, implement, calibrate and interpret the results of energy modeling software when applied to new and existing building and systems energy performance.*

The BEMP certification complements ASHRAE’s Building Energy Quotient (BuildingEQ) program by helping to ensure that only qualified practitioners can submit As Designed Workbooks to receive building ratings from ASHRAE. Only those certified as BEMPs, and Professional

Engineers licensed in the jurisdiction where a BuildingEQ project is located, may submit the As Designed Workbooks to ASHRAE. Like BEAPs who may submit In Operation BuildingEQ Workbooks, BEMPs may display the BuildingEQ Certified Provider logo with descriptions of their services.

Building Commissioning Professional (BCxP)

The BCxP certification, recognized by the U.S. Department of Energy (DOE) as meeting the Better Buildings Workforce Guidelines (BBWG), validates competency to *lead, plan, coordinate and manage a commissioning team to implement commissioning processes in new and existing buildings.*

Many building owners look for ways to lower energy bills, reduce change orders during construction, avoid premature equipment replacement costs, and create safer and healthier buildings. Building commissioning measures and tunes up performance of existing buildings and ensures that new buildings begin their lifecycle at optimal productivity.

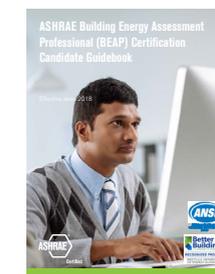

Healthcare Facility Design Professional (HFDP)

The HFDP certification validates competency to *incorporate standards, guidelines as well as unique healthcare facility requirements and design principles in HVAC system design.*

Growing numbers of aging medical facilities, advances in technology, shifting environmental requirements and an increasingly older population have created a critical need for expansion and renovation of healthcare facilities.

Building Energy Assessment Professional (BEAP)

The BEAP certification, recognized by the U.S. Department of Energy (DOE) as meeting the Better Buildings Workforce Guidelines (BBWG), validates competency to *assess commercial building systems and site conditions, analyze and evaluate equipment and energy usage, and recommend strategies to optimize building resource utilization.*

The BEAP certification is integral to ASHRAE’s Building Energy Quotient (BuildingEQ) program by helping to ensure that only qualified practitioners can submit In Operation Workbooks to receive building ratings from ASHRAE. Only those certified as BEAPs, or Professional Engineers licensed in the jurisdiction where a BuildingEQ project is located, may submit the In Operation Workbook. Additionally, only BEAPs (and BEMPs) may display the BuildingEQ Certified Provider logo with descriptions of their services.

Operations & Performance Management Professional (OPMP)

The OPMP certification validates competency to *manage facility operations and maintenance to achieve building performance goals, including those related to indoor environmental quality, health and safety.*

Today’s complex buildings can fade from green to gray when building operators don’t realize the full potential of the systems they manage. Staying current with the latest facility operation strategies and technologies can reduce energy use in buildings by 10% to 40%.

Value of Earning Your ASHRAE Certification

In a recent “Value of Certification” survey, this is what ASHRAE-certified professionals had to say:

- *ASHRAE Certification validates my level of specialized knowledge and ability (89%).*
- *ASHRAE Certification helps differentiate me from my peers (82%).*
- *In my field, ASHRAE Certification has provided me with greater professional recognition (73%).*
